Office Action Summary

Art Unit: 2834

Claims 1 and 8 are rejected under 35 U.S.C. 102 as anticipated by Takayama or Yuhara.

Claims 3-7 and 9 are rejected under 35 U.S.C. 103 as unpatentable over Takayama or Yuhara for the specific reasons set forth in paper no. 13 (08-21-02).

Regarding applicants comments it is noted that it has been held that the recitation that an element is "capable of" performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138. The examiner speculates or purposes that unlimited exposure (say 200 million years) of an aluminum thin film to a fluoride based gas would probably show some etching. Applicant has not shown any evidence that the aluminum used by the references is not capable of fluorine-based gas etching. The second layer is being defined as a concept rather than any specific material.

Kimura is withdrawn as a reference.

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2834

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
